DETAILED ACTION

Claim Rejections - 35 USC § 103

The rejection of claims 1-10 and 12-15¹ from the Office Action dated 13 January 2010 under 35 USC 103(a) over Neerinck in view of Moronuki is hereby incorporated in reference by its entirety.

Response to Arguments

Applicant's arguments filed 13 May 2010 have been fully considered but they are not persuasive.

Regarding applicant's arguments of unexpected results, the data presented by applicant is not persuasive. Firstly the Examiner notes that the instant claims are broader than a mere disclosure of Ti+DLN+DLC, for these results to be considered unexpected for purposes of obviating the combination Applicants will need to amend the instant claims as such to reflect those which they have proper unexpected results for. However, it cannot be readily gleaned how the combination of Neerinck and Moronuki does not result in Ti+DLN+DLC as Neerinck teaches DLN+DLC and Moronuki teaches adding a metal intermediary between a substrate and DLN -- This would be equivalent to a structure of substrate+Ti+DLN+DLC which are more or less what the instant independent claims present. Applicants seem to be attacking both of the references individually and not the combination of them in this attempt to show an unexpected

result. Even if applicant's arguments were persuasive in this case, Moronuki recites usage of chromium which is explicitly claimed.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
